

CPSC 351 Programming Assignment 1

1. Authors

Joseph Luong, Section 02, jluong13@csu.fullerton.edu

Ben Cheng, Section 02, Vasts@csu.fullerton.edu

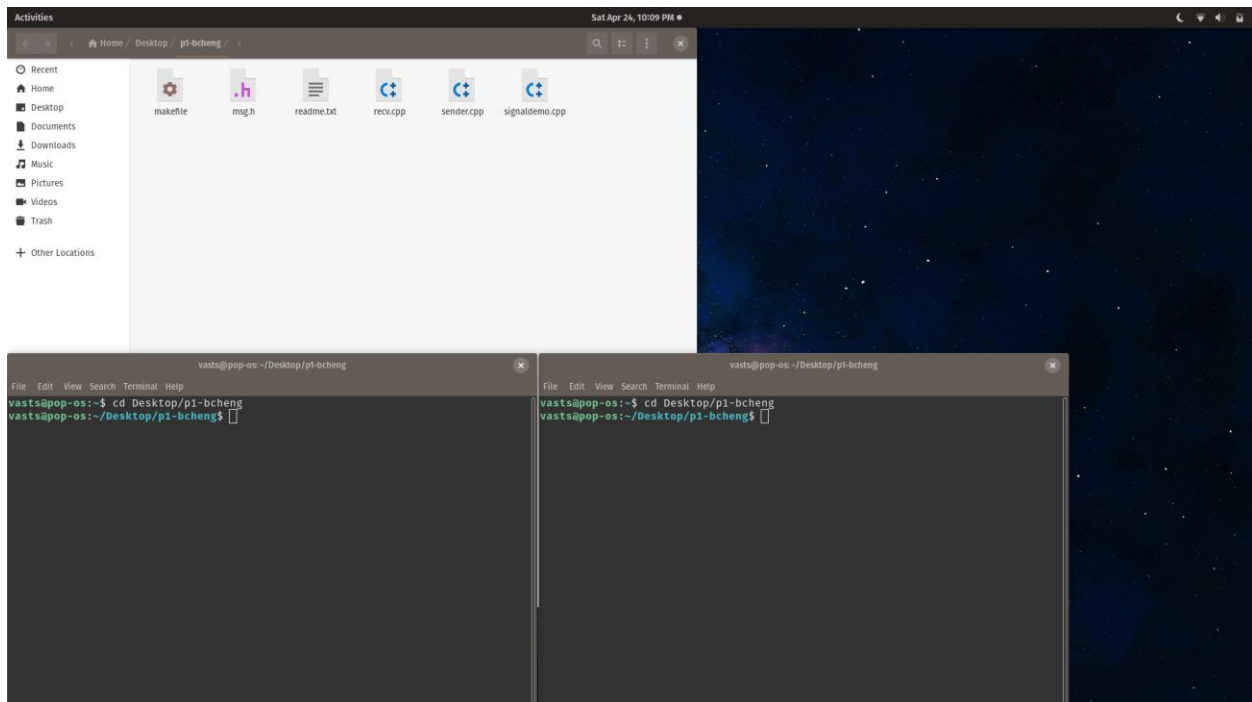

Albert Dang, Section 02, dangqalbert@csu.fullerton.edu

Jyo Jain, Section 02, jyojain@csu.fullerton.edu

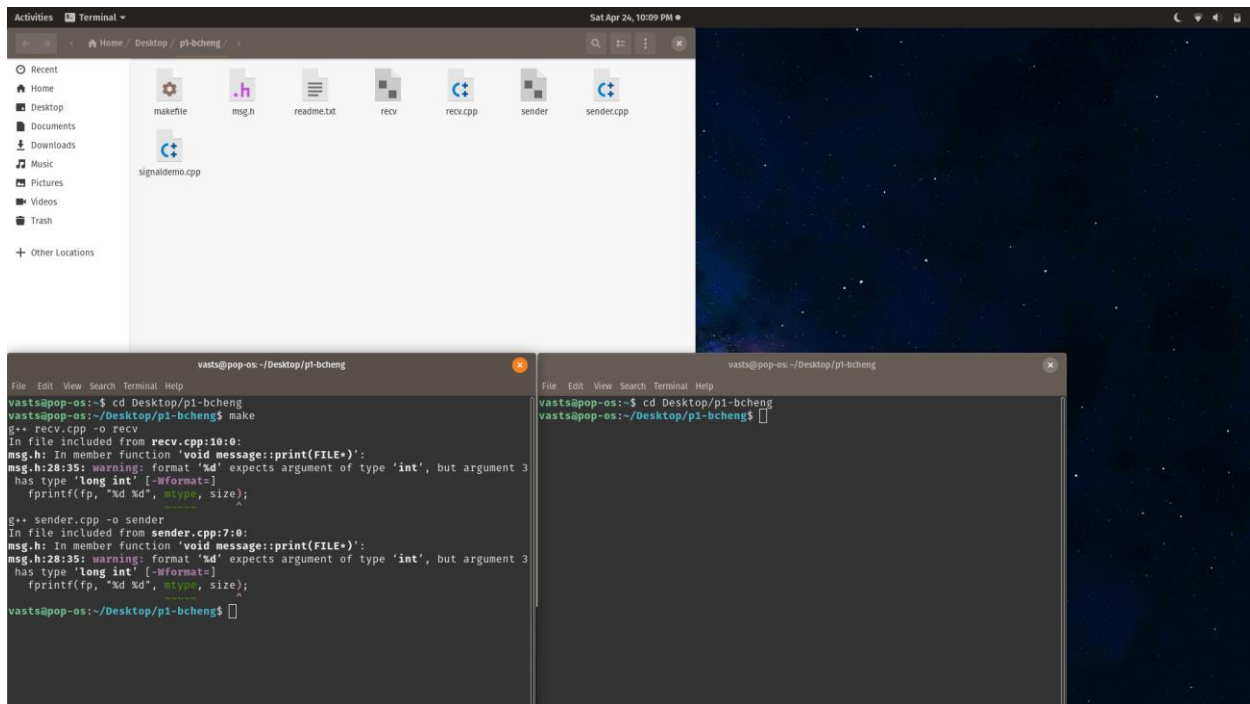

2. Program Execution

Platform: Linux, C++

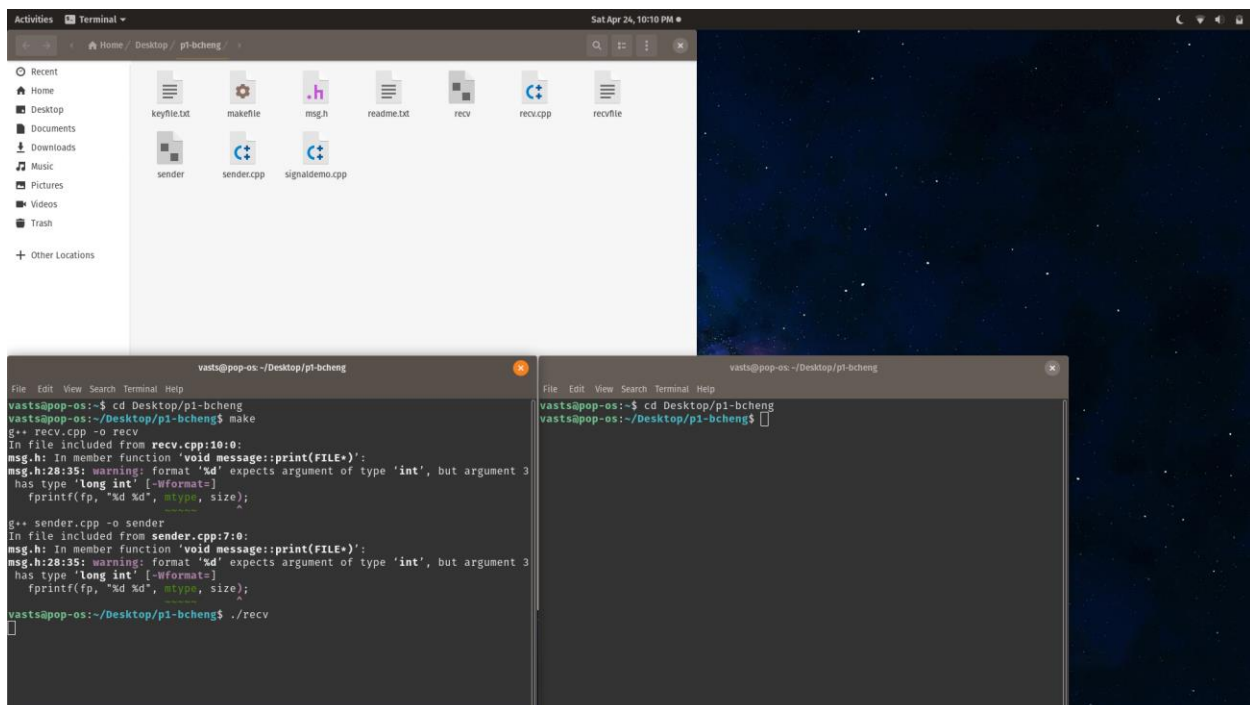

Start

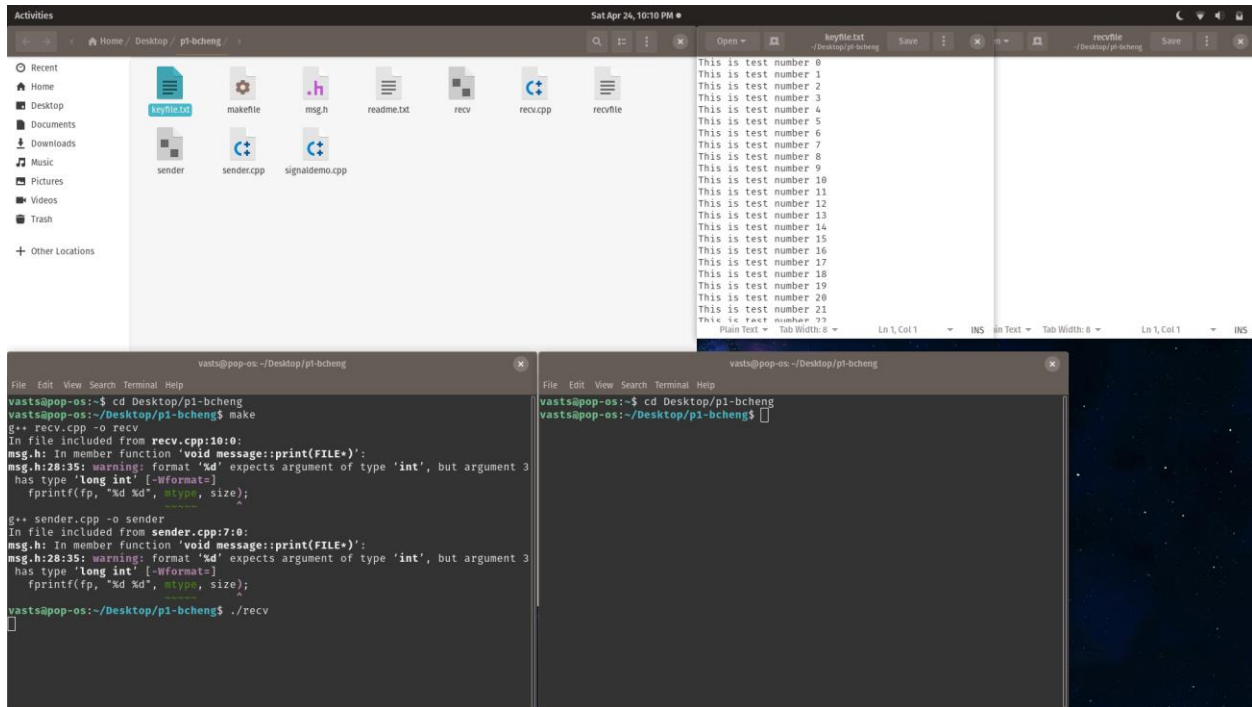

Open 1st terminal and compile recv and sender with make

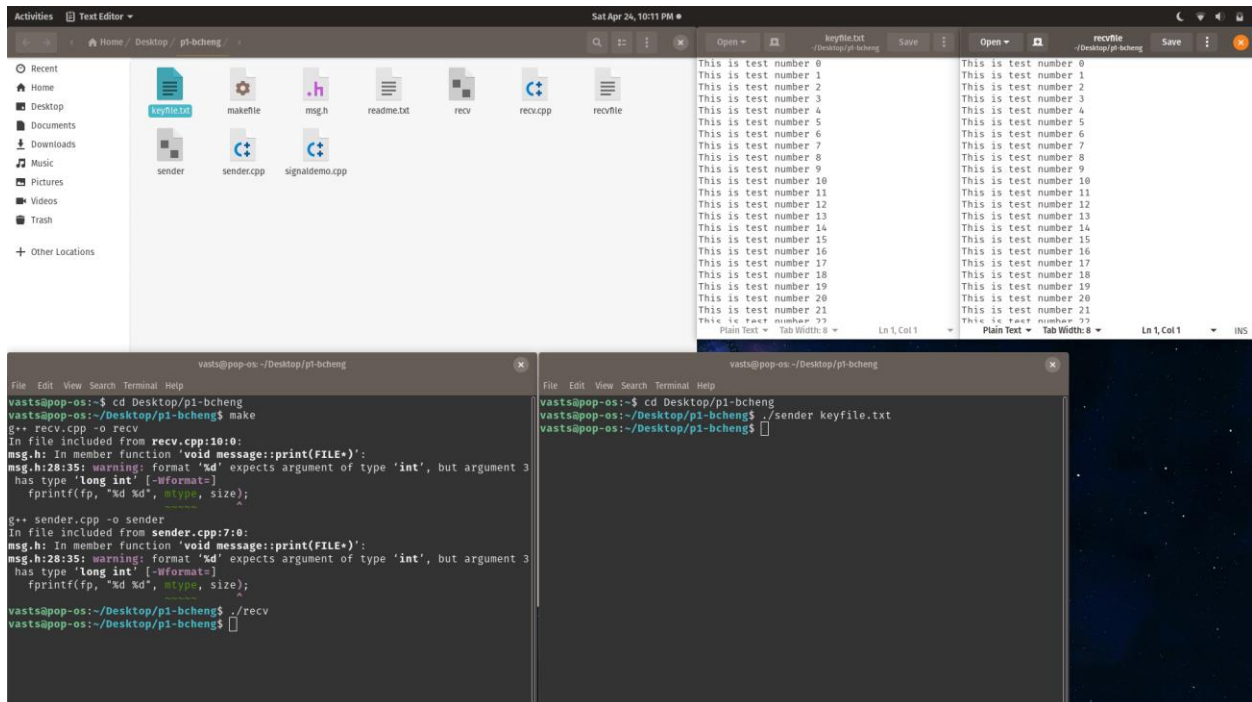

Execute recv with ./recv

Keyfile with 1000 lines of text and a blank recvfile will be created

Open 2nd terminal and execute sender with `./sender keyfile.txt`

Recvfile will be updated containing keyfile contents

No Extra Credit

3. Contributions

Albert and Jyo outlined and designed the programs

Joseph developed sender.cpp and found resources to help understand concepts

Ben developed recv.cpp and bug testing
